

CUSTOM MEASUREMENT FORM

BY LIV Bespoke

- 1** Overall height
- 2** Shoulder breadth - measure across shoulders between tips of shoulder blades
- 3** Arm length - keep your arm in normal position by your side and measure from tip of humerus to wrist bone
- 4** Chest measurement - Raise your arms. Place the tape just below the armpits then lower your arms. Take the chest measurement with the tape fitting close under the armpits, in a relaxed position and breathing normally (Nipple level for a woman).
- 5** Shoulder-blade/crotch-length - place the tape measure on the backbone and measure from the first vertebra at the base of the neck to halfway down the curve of the buttocks 4 cm beneath the coccyx.
- 6** Waist - measure at the level of the navel.
- 7** Pelvis - measure above the buttocks.
- 8** Thigh - measure at the widest point.
- 9** Calf - measure at the widest point.
- 10** Inside leg - measure length from crotch to ankle bone.
- 11** Neck - measure at the center of the neck on the Adam's apple. Indicate in a separate not of the neck is visibly long or short and if the chin is particularly pronounced.
- 12** Biceps - with your arm at your side, measure at the center of the muscle.
- 13** Forearm circumference - measure at the widest point a few centimeters below the elbow.
- 14** Wrist - measure at the smallest point.
